

RAW File Release / Request - \$250

On occasion, we are asked to provide the RAW and UN-edited files for the clients to edit, enhance and then convert themselves. While we do not prefer this method of handling, it is a request we do honor if requested.

ALL and ONLY the RAW files in .CR2 format will be included if this form is included within any contract. We will NOT do any of our own processing or editing, and is fully up to the client for the final product to be achieved.

Due to the size of RAW files, a flash drive of a minimum of 64GB is required to be provided by the client to handle the RAW files. An additional \$25 fee will apply if we have to supply the drive.

ALL final processing is up to the client. We will NOT be responsible for the files becoming corrupt, or if the client is unable to successfully convert the files to a likable image. RAW data is included in the format, with the correct software and files being handed over, we are 100% sure that a correct and acceptable image can be achieved.

In the event there is a discrepancy, we have the right to do our own editing and convert, then post to verify that the files are correct, and images can be achieved from the files being delivered.

We will NOT host the files online. RAW files means you take over the metadata of the photos, meaning you will now own them, and Leriche Photography will not have any connection to the files after completion. This request carries a \$250 charge.

Charges and same contract rules apply to any session type, including weddings and all sessions. Leriche Photography is NOT to be affiliated after edits, or tagged and/or mentioned in relation to the files for any reason.

This contract has ZERO exceptions

By signing this form, the client(s) agree to the terms of this RAW file request.
